In April 2013, the Government announced new funding of £150 million for physical education (PE) and sport. This funding is ring-fenced and schools must spend it on improving the quality and breadth of PE and sport provision.

The funding for this academic year, totalling £19,090, will be used to develop a variety of provisions. These will include adaptations to the fixed equipment on our playing field, to further promote the benefits of children engaging with activities to support their health and sense of well-being.

Development of our outdoor space, through the creation of playground markings and additional climbing equipment will champion independent and co-operative learning experiences through positive play, enhancing the children's physical and psychological well-being. This aligns well with one of our Trust commitments to providing *as much as possible, as often as possible, for as many as possible* which structure the learning environment and foster collaborative experiences in order to support teamwork and strategic thinking skills.

Our Sports Premium will also be used to develop further lunchtime and after-school clubs to encourage children to take up physical activities in their own time. These clubs will introduce them to a variety of sports and team games throughout the year, including football, basketball and athletics.

Part of the funding will also be used to provide specialist coaches to model high-quality PE lessons for children in all areas of the PE curriculum. Staff will continue to observe these coaches as part of their ongoing training to develop their skills, enabling staff to deliver high quality PE lessons in the future.

Our funding will also be used to ensure that children have opportunities to participate in inter-school tournaments and competitions throughout the year.

All children's sporting achievements, whether in school or out of school, are celebrated in assemblies to encourage all children to participate in sport.
